

K-HAT: Kaua‘i Hazard Assessment Tool

- Please be patient and wait for the site to load completely before proceeding. You are ready to begin once you have accepted the disclaimer and a map of Kaua‘i is displayed.
- Enter the Name/TMK/Address of a property into the appropriate text box as shown in the example above each respective box. Click **GO**.
- After the search results are returned and the map is drawn completely, proceed by clicking on the **Zoom to Parcel** link included in the appropriate search result.
- The map will redraw, zooming to the selected parcel. Once the map is drawn completely, click on the **Report** link in the search result to generate a report for the parcel.
- The report appears as a pop-up, so you will need to disable your pop-up blocker if you are using one.
- Use the **Help** and **Info** tabs in the upper left of the site for more information.
- The parcel data used by this application was last updated in 2002. 2006 data will be posted shortly.
